

CUSTOM E-LEARNING DEVELOPMENT

built to *support*

Well trained employees are much more productive and find their work experience more fulfilling. Training makes a huge difference in employee performance. Studies have proven that e-learning is often the **most effective and economical method of training**.

elevate education e-learning benefits

We have been developing effective custom e-learning courses **since 1991** and have seen the numerous benefits of this technology including:

- **E-learning saves time.**

Studies show a 45% decrease in training time to reach the same level of competence.

- **E-learning saves money**

when compared to instructor led training. Lower delivery costs for e-Learning result primarily from a reduction in training time and the elimination of travel.

- **People learn better**

with e-Learning because they remember what they learn more accurately and longer.

- **Proof of training** is easy using built in tools to track learner progress.

- Web delivered training can be **updated easily**, ensuring consistently up-to-the-minute training. When policies change, the training can change.

- **Accessibility** and multiple languages can be easily incorporated so everyone can benefit from the training.

the industries we've served

Over the years we've helped hundreds of organizations in most industries train employees. Our Instructional Designers are "experts at becoming experts" in any industry. We **can** help yours!

Medical & Healthcare

Policies & Procedures
